CONTENTS

Preface
R.W. Grubbström and H.H. Hinterhuber xiii
Telemanufacturing: A flexible manufacturing solution
L.L. Abdel-Malek, C. Wolf and P.D. Guyot 1
Optimal production run for processes with constant and random drifts
K.S. Al-Sultan and A. Raouf 13
Costing partial order cycles in the temporary sale price problem
F.J. Arcelus and G. Srinivasan 21
Ranking of enterprises based on multicriterial analysis
Z. Babic and N. Plazibat 29
A knowledge-based expert system approach for the auditing process of some elements in the quality assurance system
D. Bayraktar 37
Performance analysis of a flexible manufacturing system: A statistical approach
A. D'Angelo, M. Gastaldi and N. Levialdi 47
The break quantity rule's effect on inventory costs in a 1-warehouse, *N*-retailers distribution system
R. Dekker, M.J. Kleijn and A.G. de Kok 61
A spare parts stocking policy based on equipment criticality
R. Dekker, M.J. Kleijn and P.J. de Rooij 69
Make-to-order policies for a stochastic lot-sizing problem using overtime
N.P. Dellaert and M.T. Melo 79
Sustainable production: The ultimate result of a continuous improvement
A.J. de Ron 99
Using simulation to evaluate the introduction of a Kanban subsystem within an MRP-controlled manufacturing environment
R. De Smet and L. Gelders 111
Production–inventory control under environmental constraints
I. Dobos 123
Productivity reconsidered: Critical assessment of investments
E. Eloranta and J. Holmström 133
Simulation approach in comparison of a pull system in a cell production system with a push system in a conventional production system according to flexible cost: A case study
T. Ertay 145
Application of a simulation methodology to the redesign of a logistical control system
G.N. Evans, M.M. Naim and D.R. Towill 157
Development of the production using participative simulation games: Two case studies
M. Forssén-Nyberg and J. Hakamäki 169
Strategic planning for long-distance telecommunications: A symbiotic production system
M. Gastaldi and N. Levialdi 179
Multiple lot-sizing, and value of probabilistic information, in production to order of an uncertain size
Y. Gerchak and A. Grosfeld-Nir 191

A decision support system for supplier selection using an integrated analytic hierarchy process and linear programming
S.H. Ghodsypour and C. O'Brien 199
A net present value approach to safety stocks in planned production
R.W. Grubbström 213
Implementation of activity-based costing in manufacturing
A. Gunasekaran and M. Sarhadi 231
Production planning with multiple objectives in decentralized organizations
C. Homburg 243
Sharpening logistics customer service strategy planning by applying Kano's quality element classification
J. Huiskonen and T. Pirttilä 253
Price dynamics on the recovered paper market
A. Huttunen and T. Pirttilä 261
An inventory model with Poisson demands and emergency orders
S.G. Johansen and A. Thorstenson 275
An overhaul–replacement model for equipment subject to technological change in an inflation-prone economy
E.E. Karsak and E. Tolga 291
An analytic hierarchy process-based approach to the strategic management of logistic service: An empirical study in the mechanical forest industry
J. Korpela, M. Tuominen and M. Valoaho 303
Making sense of technology: Towards a synthesis between neoclassical and evolutionary approaches
K. Kyläheiko 319
Embedding the management of evolution into strategic learning
T. Laakso, S. Kleinhans, R. Smeds and G. Doumeingts 333
The performance of workload control concepts in job shops: Improving the release method
M. Land and G. Gaalman 347
Investigating sensitivity and the impact of information on pricing decisions in an M/M/1/∞ queueing model
C. Larsen 365
Transport time policy and service level as components in logistics strategy: A case study
A. Lehmusvaara 379
What prevents companies from improving logistics operations: Some empirical findings
A. Lehmusvaara and J. Huiskonen 389
Strategic networks: The emerging business organization and its impact on production costs
B.M. Levin 397
Total quality management of a production–maintenance system: A network approach
E. Levner, D. Zuckerman and G. Meirovich 407
Strategic moves at the prospect of a deregulated electricity market
T. Lindblom and B. Andersson 423
Transferring world class production to developing countries: A strategic model
R.N. Mefford and P. Bruun 433

A small business international market selection model
J.R. Minifie and V. West 451
A progressive figure-based production planning system for a component manufacturer
H. Missbauer, G. Zäpfel and W. Hauber 463
Reorganizing for product development: Evidence from Japanese automobile firms
M. Muffatto 483
Describing products as executable programs: Variant specification in a customer-oriented environment
K.A. Olsen and P. Sætre 495
Subcontract coordination in construction
R. Olsson 503
A minimax distribution free procedure for a mixed inventory model with variable lead time
L.-Y. Ouyang and K.-S. Wu 511
Testing manufacturing strategy formulation processes
K.W. Platts, J.F. Mills, M.C. Bourne, A.D. Neely, A.H. Richards and M.J. Gregory 517
Applicability of statistical process control techniques
W.A.J. Schippers 525
Case-based reasoning for production scheduling
G. Schmidt 537
Hierarchical planning in organizations: Elements of a general theory
C. Schneeweiss 547
A methodology for integrating economic criteria in design and production management decisions
O. Sénéchal and C. Tahon 557
An analysis of the impact of plant and management variables in a multi-stage, mixed-model production system
A. Sianesi 575
The development of a method for determining the efficiency and effectiveness of installed CAPM systems
P.J. Sitoh, P.M. Braiden and J.E.L. Simmons 587
Managing capacity in tightly constrained systems
S.V. Sridharan 601
Exploring the diversity of teams
T. Tanskanen, P. Buhanist and H. Kostama 611
A cost function of Greek non-ferrous metal industry
K.D. Tsekouras and N.G. Zagouras 621
Configuration and coordination of virtual production networks
A. Tuma 641
Designing scheduling systems for packaging in process industries: A tobacco company case
P. Van Dam, G.J.C. Gaalman and G. Sierksma 649
Delivery performance improvement by controlled work-order release and work-center load balancing
H.P.G. van Ooijen 661
A survey of procurement strategy development in industrial companies
V.-M. Virolainen 677

Developing material delivery processes in cooperation: An application example of the construction industry
T. Wegelius-Lehtonen and S. Pahkala 689
Customer-order-driven production: An economical concept for responding to demand uncertainty
G. Zäpfel 699
Simulation of activity costs for the reengineering of production systems
G. Zülch and B. Brinkmeier 711
Diary of Events 723
Author Index to Volume 56–57 725
